PATCHES PAPERCRAFT

How to build

Step 1: Print

Any paper will do! For best results, I recommend something above 100g/m2 A4 paper. The template is one sided, and is contained on a single A4 page.

Step 2: Cut

Cut out the pieces along solid thick lines, either with scissors or a craft knife. Watch out for sharp tools!

Step 3: Fold

Fold the template, following the key from below. You can make this easier by scoring the paper before hand, with something like a folder or a knife.

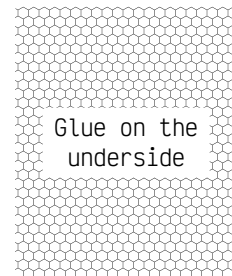

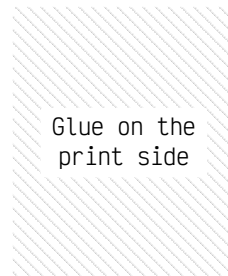

Cut alongside this:

Hill fold:

Valley fold:

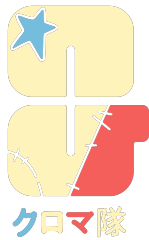

Step 4: Glue

Using any glue you have (or tape!) stick the paper together according to the key. Use photos for reference if you're unsure! The tabs are numbered as a recommended order.

And that's it!

Thank you for building <3

The character Patches was made by SoTofu - thanks for being a good friend!
